## Intro to Machine Learning

TOTAL POINTS 15

| 1. Supervised learning deals with unlabeled data, while unsupervised learning deals with labelled data.  | 3 points |  |
|--|----------|--|
| ○ True   |          |  |
| False  |          |  |
|  |          |  |
| 2. Which of the following is <b>not true</b> about Machine Learning?   | 3 points |  |
| Machine Learning was inspired by the learning process of human beings.   |          |  |
| Machine Learning models iteratively learn from data, and allow computers to find hidden insights.  |          |  |
| Machine Learning models help     us in tasks such as object recognition, summarization, and recommendation.  |          |  |
| Machine learning gives computers the ability to make decision by writing down rules and methods and being explicitly programmed.   |          |  |
|  |          |  |
| 3. Which of the following groups are not Machine Learning techniques?  | 3 points |  |
| Classification and Clustering  |          |  |
| Numpy, Scipy and Scikit-Learn  |          |  |
| Anomaly Detection and Recommendation Systems   |          |  |
|  |          |  |
| 4. The "Regression" technique in Machine Learning is a group of algorithms that are used for:  | 3 points |  |
| <ul> <li>Predicting a continuous value; for example predicting the price of a house based on its characteristics.</li> </ul>   |          |  |
| Prediction of class/category of a case; for example a cell is benign or malignant, or a customer will churn or not.  |          |  |
| <ul> <li>Finding items/events that often co-occur; for example grocery items that are usually bought together by a<br/>customer.</li> </ul>                                  |          |  |
|  |          |  |
| <ol><li>When comparing Supervised with Unsupervised learning, is this sentence True or False?</li></ol>  | 3 points |  |
| In contrast to Supervised learning, Unsupervised learning has more models and more evaluation methods that can used in order to ensure the outcome of the model is accurate. | be       |  |
| False  |          |  |
| ○ True   |          |  |
